

## **MUNICIPAL DEMAND SERVICE**

Rate Designation: ELMD

### **Application**

Applied to departments or branches of the City of Waverly with demand requirements over 50 kW occurring four (4) or more months in a twelve (12) month period. This includes City departmental operations within the service area for service delivered through one meter at one location for all purposes. Service is subject to applicable terms and conditions of Waverly Utilities' electric service Rules of Operation.

### **Character of Service**

Three phase 120/208 or 277/480 volts.

Three phase 120/208 services with service entrance panels rated 800 amps or larger and three phase 277/480 services with services entrance panels rated 400 amps or larger are automatically assigned to General Service or Municipal Demand Service (50 kW demand requirement is waived).

### **Monthly Rate**

Customer Charge: \$ 200.90 per month

Demand Charge per kW:	Summer	Winter
All kW	16.55	13.82
Demand minimum charge \$402.57		
Energy Charge:	All Year	
First 250 kWh per kW of billing demand	.0790	
Balance kWh	.0521	

### **Billing Demand**

Metered demand shall be the highest integrated fifteen-minute demand occurring during the month. Adjusted metered demand shall be the metered demand after making adjustment for power factor. Billing demand shall be the current month adjusted metered demand or 50 percent of the highest billing demand for the previous eleven (11) months, whichever is higher. The minimum billing demand shall be 30 kW.

### **Power Factor Adjustment**

*If the average power factor during the billing month is less than 90% lagging, the metered demand shall be increased by 1% for each 1% that the power factor is found to be less than 90%. The power factor will be determined from Company meters used for power factor determination.*
